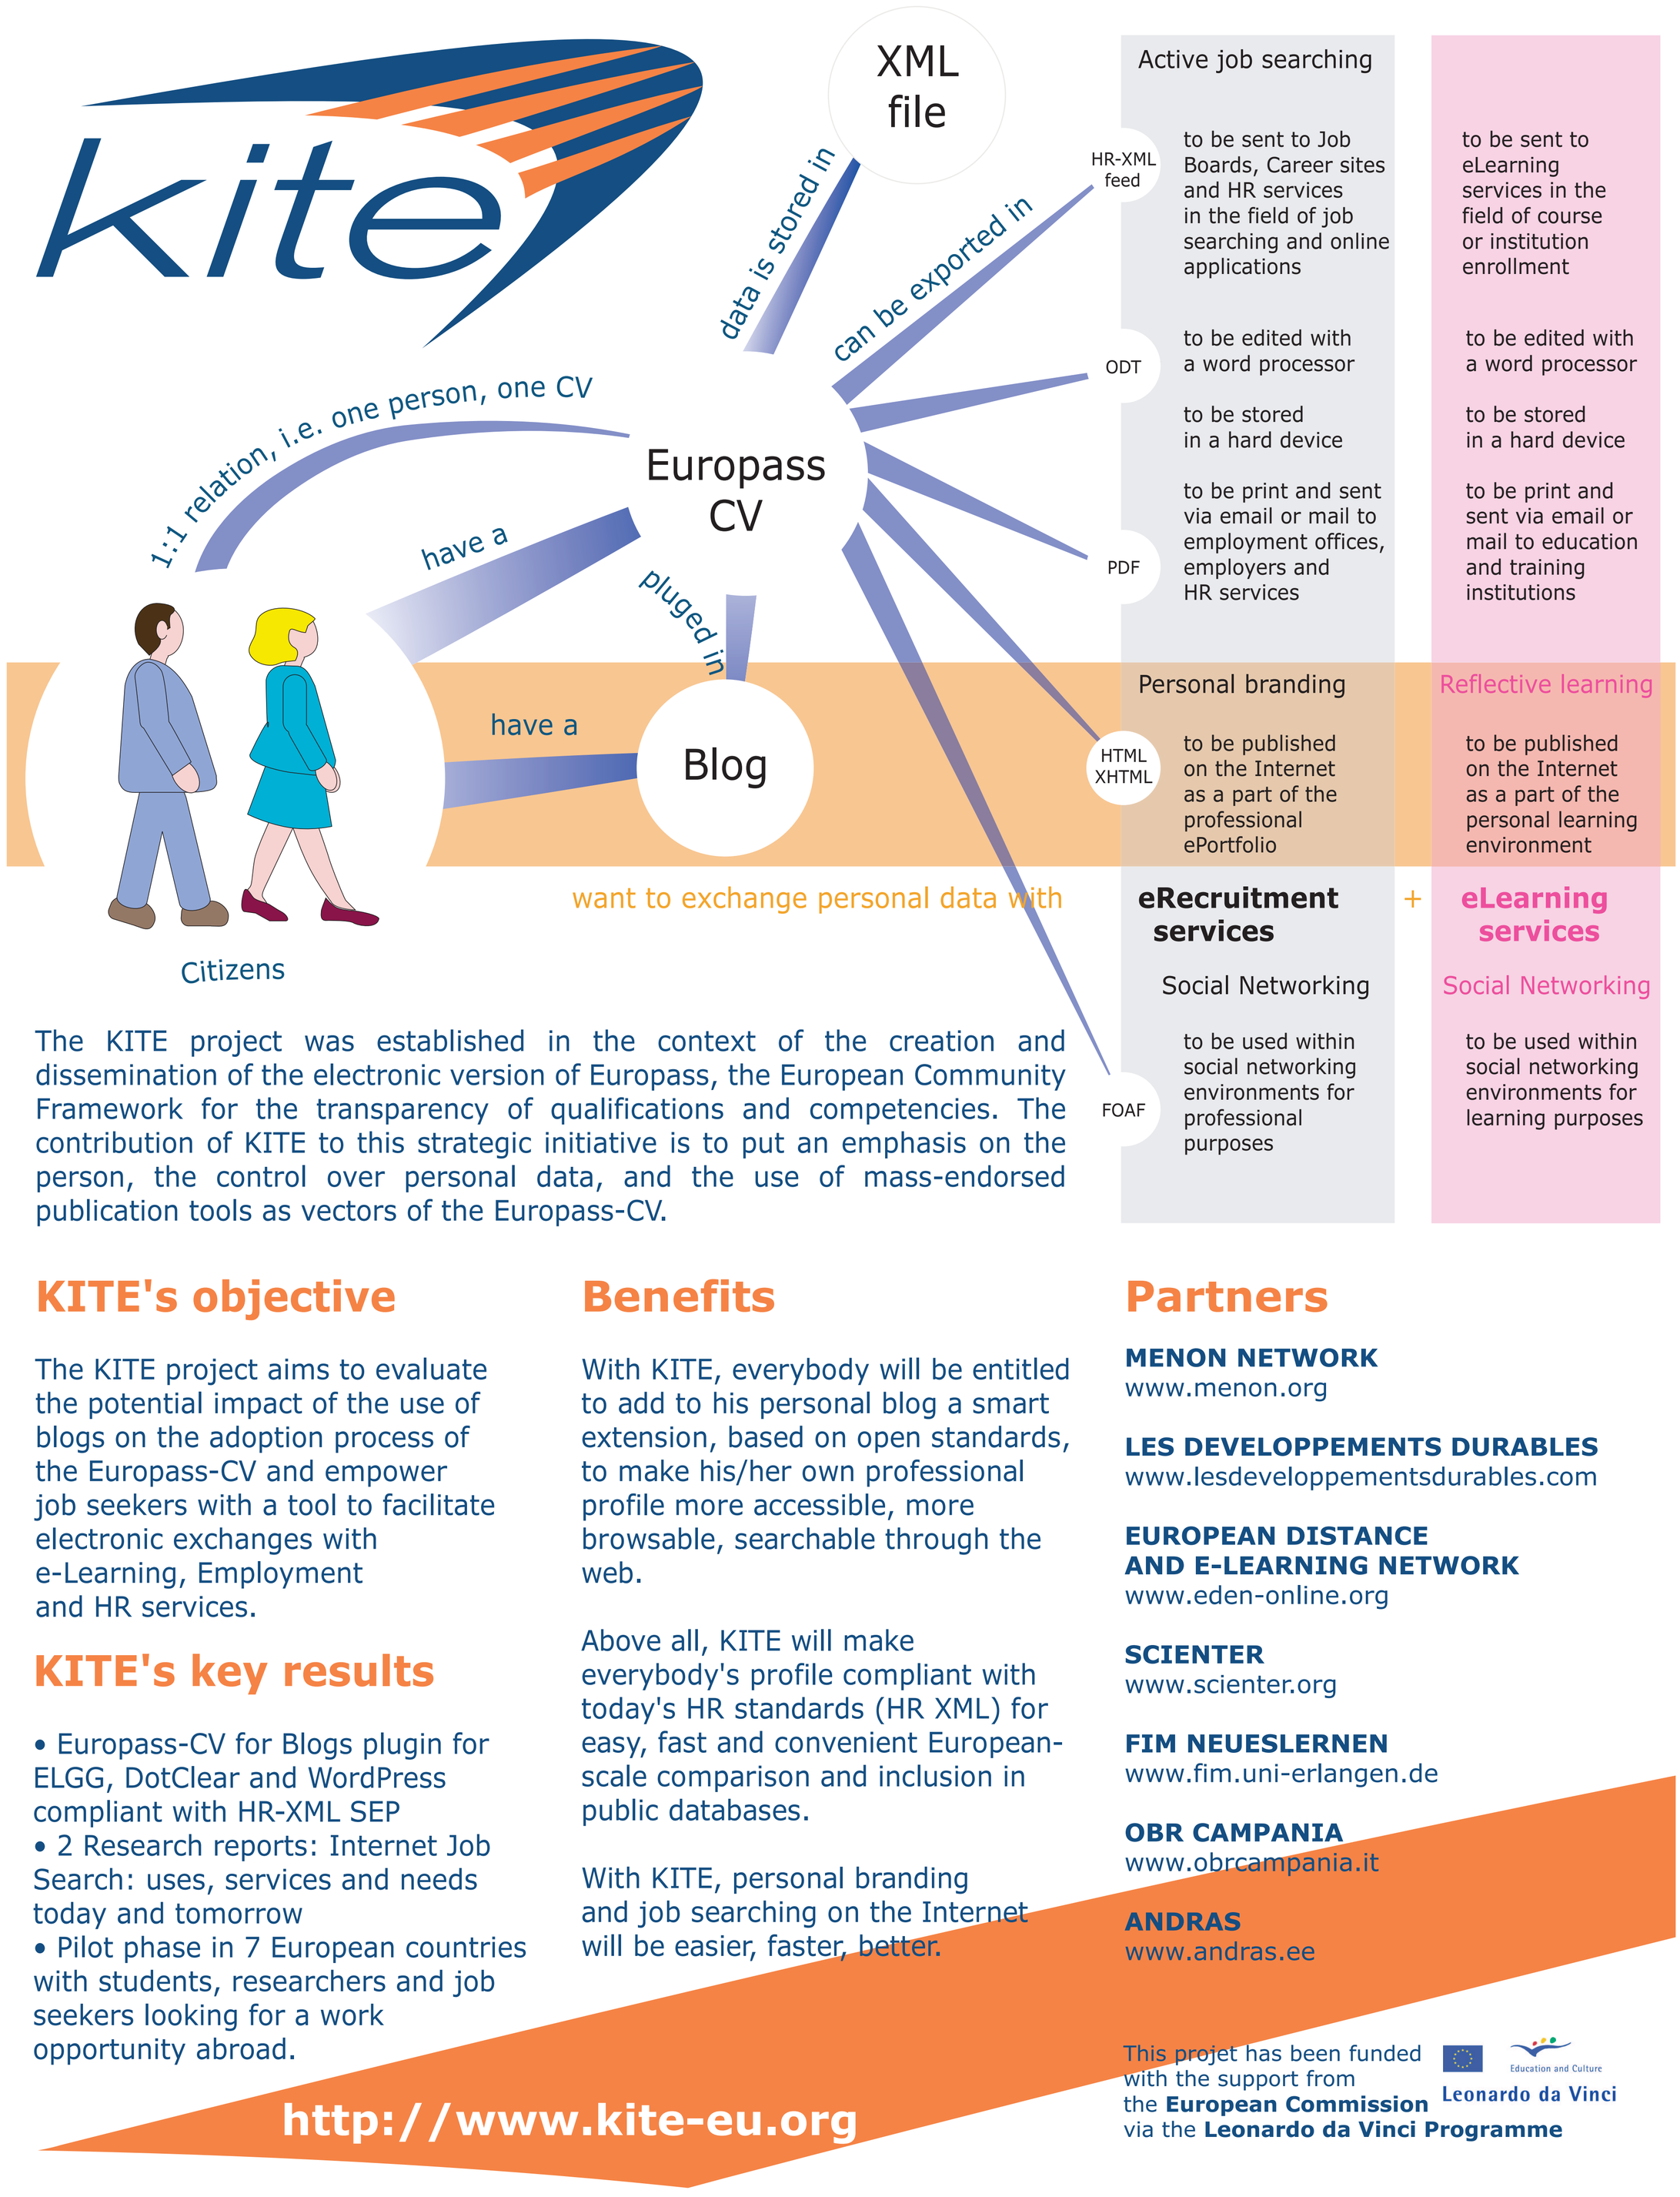
The European mobile worker's kit

The Europass CV plugin for blogs is a tool for a federated identity controlled by the owner and secure, customizable, portable, interoperable, accessible, multilingual, multimedia, ergonomic and usable, evolutionary, social, sustainable, open and free!

No more personal data, impossible to update and track, spread through the Internet within eLearning, eRecruitment and HR services!

kite



The KITE project was established in the context of the creation and dissemination of the electronic version of Europass, the European Community Framework for the transparency of qualifications and competencies. The contribution of KITE to this strategic initiative is to put an emphasis on the person, the control over personal data, and the use of mass-endorsed publication tools as vectors of the Europass-CV.

KITE's objective

The KITE project aims to evaluate the potential impact of the use of blogs on the adoption process of the Europass-CV and empower job seekers with a tool to facilitate electronic exchanges with e-Learning, Employment and HR services.

KITE's key results

- Europass-CV for Blogs plugin for ELGG, DotClear and WordPress compliant with HR-XML SEP
- 2 Research reports: Internet Job Search: uses, services and needs today and tomorrow
- Pilot phase in 7 European countries with students, researchers and job seekers looking for a work opportunity abroad.

Benefits

With KITE, everybody will be entitled to add to his personal blog a smart extension, based on open standards, to make his/her own professional profile more accessible, more browsable, searchable through the web.

Above all, KITE will make everybody's profile compliant with today's HR standards (HR XML) for easy, fast and convenient European-scale comparison and inclusion in public databases.

With KITE, personal branding and job searching on the Internet will be easier, faster, better.
